

SPECIALTY MEDICAID SOLUTION

Reduce costs and improve member health with unified dental and vision administration

Because Medicaid rules and regulations are constantly changing and vary from state to state, Medicaid dental and vision programs create administrative burden and require dedicated resources. Separate Medicaid dental and vision partners can complicate matters even further and increase the time spent managing your specialty Medicaid program, taking even more of your time from higher priorities.

Let SKYGEN USA take care of your specialty Medicaid programs, so you can focus on growing other areas of your business. With more than 20 years of experience with Medicaid administration, SKYGEN USA is your trusted partner to advance your specialty Medicaid programs.

OUR BENEFITS:

SKYGEN USA's specialty Medicaid administration benefits all stakeholders, including:

MEMBERS:

Convenient access to preventive dental and vision care through innovative outreach methods

PROVIDERS:

Efficient, automated administration using a completely paperless platform

PAYERS:

Scalable, flexible technology and services to coordinate integrated dental and vision benefits

CLIENT EXPERIENCE:

You can rest easy when your specialty Medicaid program is in the hands of Medicaid administration experts. SKYGEN USA offers end-to-end, full-service benefit administration for specialty Medicaid programs of any size. Since our company was born from Medicaid administration, we are experts in understanding and applying state rules and regulations for Medicaid programs in everything we do.

With SKYGEN USA as your partner, you can pick and choose which services to keep in house and which to outsource to us. Our comprehensive services for specialty Medicaid programs include:

Custom network development – Choose providers for your network. Instead of a one-size-fits-all network, we collaborate with you to understand your unique business needs, creating a custom network built just for you.

Self-service provider portal – Capture self-reported information throughout the provider data life cycle. Our easy-to-use provider portal allows providers to manage credentialing, contracts, member benefit verification, authorizations, and claims all online.

Automated claims processing – Efficiently process claims without manual intervention. Our built-in system edits automatically process clean claims with no human interaction.

Provider rating and recognition program – Automatically refer members to the highest-rated providers. Our provider ratings identify providers delivering the most appropriate and efficient care based on configurable, weighted criteria.

With our proven track record for meeting state regulatory requirements and exceeding client expectations, we can offer you peace of mind that the best quality, most cost efficient care can be delivered to members.
